EUPHONY THE SOUND OF LIFE

Author: [Daniel Levy](#)

Language: English

Also available in [Italian](#) and [Spanish](#)

Format: paperback

Other format available: [eBook](#) (PDF)

[Euphony – The Sound of Life](#) by [Daniel Levy](#) is a pioneering book that, since its initial publication in 1986, has represented an essential text in the discovery of the world of Sound and Music. The book deals with the **effects of sound on the human being**, offering a detailed analysis of the meaning and function of music, its great potential as a Science/Art, and the reasons why it is a golden key to the knowledge of ourselves and of the universe.

"Today there is a proliferation of books purporting to be on sound (particularly through mantra) therapeutics. These are often patchy, poorly researched, particularly regarding the pronunciation

of Sanskrit mantras, and productive of mood rather than true transformation. It is therefore a refreshing pleasure to come across [Daniel Levy's](#) book, which treats the essence of Sound, acoustics of the Self, the relationship between Sound and Space. Resonance, Vibration, Harmony and the experience of Self both in sound and, perhaps more importantly, in silence.

One can only acknowledge Levy's devotion and breadth of understanding of this vital expression of our Being and unreservedly recommend this book to all genuine seekers of Self recognition through Sound and Silence."

PETER HARRISON – DIRECTOR OF WATKINS BOOKS – LONDON, UK

"Whoever has the good fortune to read [Daniel Levy's Euphony: The Sound of Life](#), will find in this book the key that, by opening our inner door, leads us to harmonic knowledge of ourselves, and teaches us, through musical movements of the Self, how to use the best of our personality by following biological rhythms and the relationships which exist between sound and the psychophysical organism in each of us."

PROF. G. ZUCO, INTERNATIONAL MAGAZINE OF PSYCHOLOGY - ITALY
